PROCESS ENGINEERING OFFICE

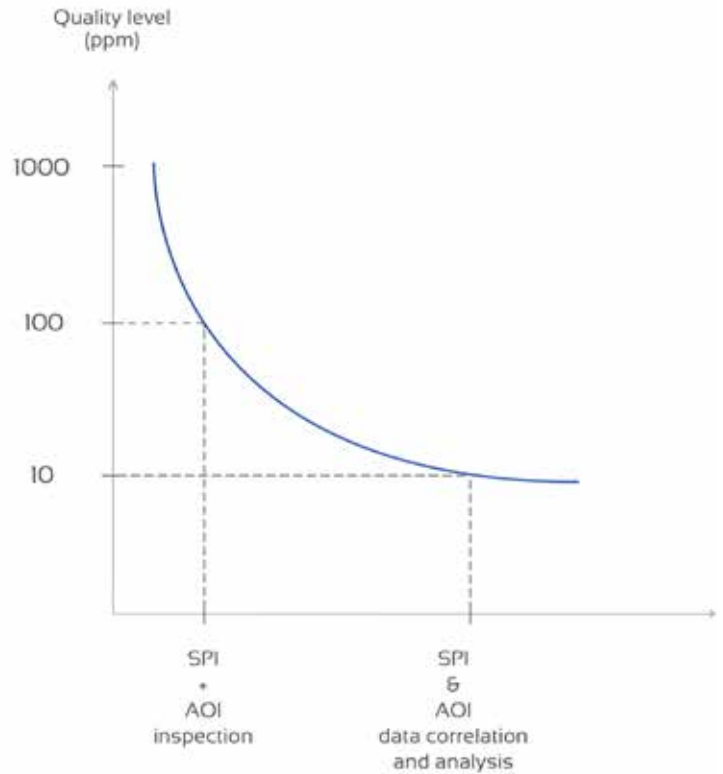

SIGMA Link is a powerful web-based software suite currently structured around 3 modules (more to come) :

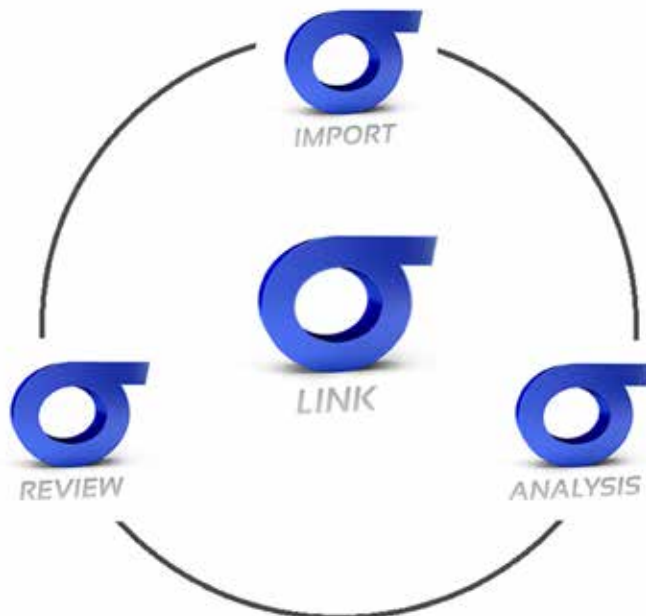

- . SIGMA Import Ease AOI and SPI programming
- . SIGMA Review SPI and AOI results at a glance
- . SIGMA Analysis Drive your process in real-time

SIGMA Link is a continuous yield improvement tool to translate SPI and AOI inspection data into useful process information. Built around a unified SPI and AOI database, a correlation of inspection data and images, SIGMA Link provides in-line monitoring, easy diagnosis of the entire PCB assembly process and full traceability of data and images.

For Smart Factories, SIGMA Link is the essential element to easily interface inspection machines with Manufacturing Execution System, to enable interlocking and to pave the way to Industry 4.0.
